Portable with 2 Channels

Ingenuity design
Small, convenient for placing and carrying

Output stability
2 channels can be used together
2 channels are adjusted independently.

Environmental protection and energy saving
Rechargeable battery can be used more than 4 hours. (Intensity: 50mA)

Real-time display
Show output parameters and status

Easy and safe
Easy to operate, safe to use

Bidirectional adjustment
Can connect with App, set custom parameters
Can do treatment without App, use main device and remember the last treatment parameters

Technical Specifications

	CE Version	FDA Version
Mode	TENS	TENS、NMES、MCR
Pulse Duration	50~400μs	50~500μs
Pulse Frequency	1~120Hz	1~120Hz
Intensity	0~60mA	TENS、NMES: 0~100mA MCR: 0~1000μA
Time	1~60min	1~60min
Battery Life	More than 4 hours	More than 4 hours

MStim Reha LGT-231

MStim Reha LGT-231
## Portable Electro-Stimulation Therapy Device

MStim Reha LGT-231 uses TENS, NMES, and MCR to stimulate nerves or muscles to help relieve pain and improve neuromuscular function.

⊕ Applications

⊘ Pain Relief

Chronic strain pain: periarthritis of shoulder, cervical spondylosis, arthritis
Acute pain: fracture or postoperativewound pain
Physical pain in women: pain in the waist and abdomen
Muscle soreness after exercise: muscle damage and ache

⊘ Excitement of Neuromuscular

Central nervous system injury or peripheral nervous system injury caused by muscle atrophy or muscle strength decline:
Stroke, cerebral palsy, traumatic brain injury, fracture, facial paralysis, long-term bedridden patient, patient in wheelchair, etc.The device can promote muscle contraction, relieve muscle atrophy, and reconstruct neural motor function.
⊕ Features

⊘ Wireless Bluetooth connection

Quick connection, easy and convenient

⊘ User-defined Programs

Parameters such as frequency, pulse width, treatment time are adjustable in all treatment modes

⊘ Preset protocols

Built in parameters and schematic diagram of muscle patch
